

## What to do after your COVID-19 test

Dear patient,

Your safety is our top priority. So before you can be admitted to our hospital we require a nasal/throat swab which we will use to screen you for COVID-19. If – and only if – the test result is positive, the hospital will contact you by phone immediately. To avoid becoming infected between your test and admission to the hospital, please remain in strict quarantine at home, observing the following rules without exception:

- Keep your distance from others (by at least 1.5 m)
- Avoid personal contact with anyone who does not live in the same household as you
- Do not use public transport
- Indoor sports should be avoided as well as all sports where the minimum distance of 1.5 m cannot be guaranteed
- Do not go into shops
- Wear a mask over your mouth and nose when leaving the building

### Please note:

It is essential to avoid infection with COVID-19 before any surgical procedure, as this could seriously impede your recovery.

Thank you for your cooperation!
